- Demonstrated experience conducting empirical research or developing analytical methodologies.
- Strong analytical, critical-thinking, and problem-solving skills.
- Excellent written and verbal communication skills, with experience producing research papers, technical reports, or policy briefs.
- Experience collaborating across research, engineering, product, or policy teams.

Preferred

- Experience developing or evaluating economics-focused AI, agentic workflows, or benchmarking environments.
- Familiarity with enterprise AI challenges and opportunities for economic research.
- Prior participation in cross-functional research initiatives bridging economics, engineering, and product development.

Compensation & Benefits Notice

The national pay range for this full-time position is base salary of $200,000 –$250,000. All employees are eligible for equity compensation, and employees may also receive performance-based bonuses, dependent on role and subject to company policies. micro1 provides a comprehensive benefits package, including up to 100% reimbursement for health-insurance premiums, paid time off, a 401(K) plan with a company match, and additional benefits designed to support a high-performing, remote-first workforce.

micro1 is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, sexual orientation, or gender identity), national origin, age, disability, genetic information, veteran status, or any other characteristic protected by applicable local laws, regulations and ordinances. If you need assistance and/or a reasonable accommodation during the application process, reach out to support@micro1.ai.

Our hiring process utilizes artificial intelligence tools to assist in candidate screening and assessment. Our AI tools are designed to complement, not replace, human decision-making.
