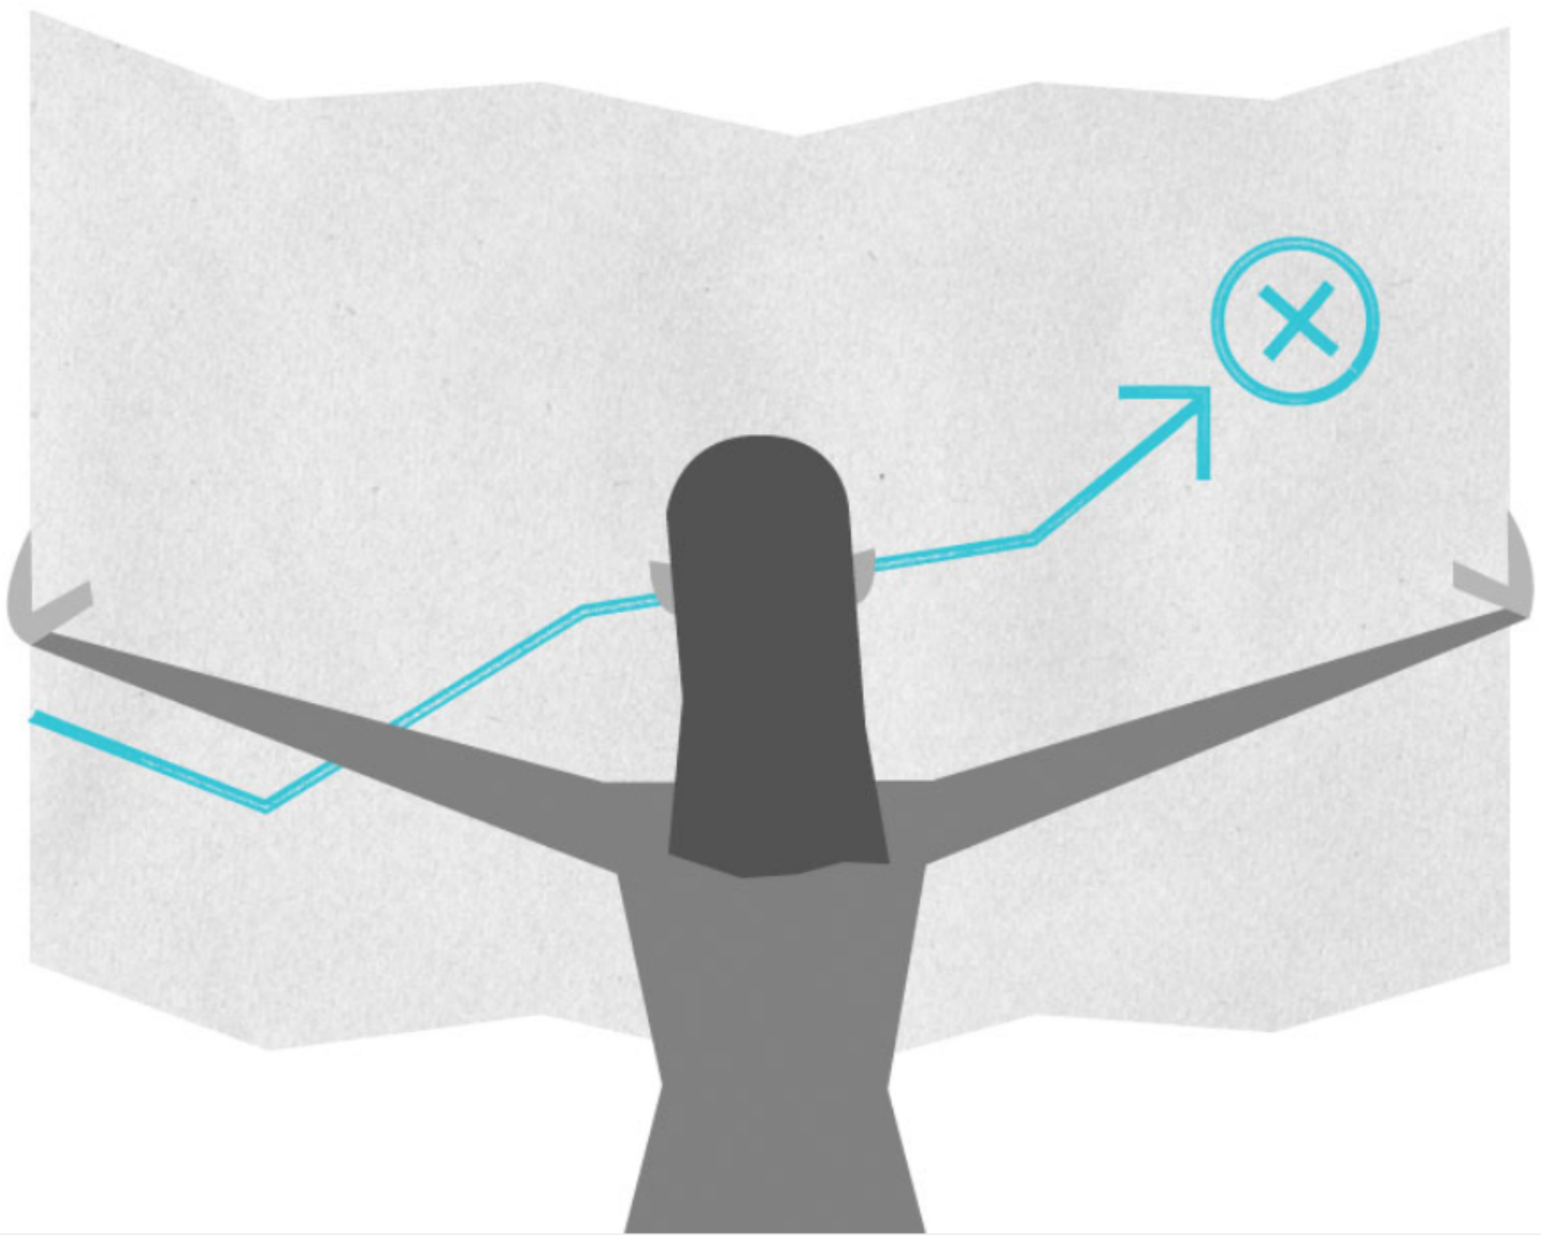
Want to upskill in AI policy? Here are 57 useful resources

By Matt Beard · Published April 17th, 2026 ·



Are you enthusiastic about developing AI policy to minimise the technology's risks and maximise its benefits? Need concrete ideas for how to enter the field?

Below, you'll find our top resources for building skills to ensure government policies are prepared for a world with powerful AI systems. In practice, this involves developing the research skills, domain expertise, and interpersonal networks you'll need to keep lawmakers informed — or work for one yourself.

We developed this list with our advisors to highlight the resources they most commonly recommend, including articles, courses, organisations, and fellowships. While we recommend applying to speak to an advisor for tailored, one-on-one guidance, this page gives a practical, noncomprehensive snapshot of how you might move from being interested in AI policy to actually working on it.

Overviews and expert advice

These resources outline the AI policy landscape, highlighting current research efforts and practical ways to begin contributing to the field.

- EmergingTechPolicy.org
- AI governance and policy career review and The US AI policy landscape by 80,000 Hours
- FAQs and general advice on AI policy careers by Miles Brundage
- How to get into AI policy by B Cavello
- Ten AI governance priorities by The Future Society
- Non-AI policy career guides such as *One year in DC* by Thomas Hochman or *Policy: an early career guide* by Jordan Schneider.
- This policy networking guide, or our general networking advice.

Courses and ideas for part-time projects

If you're looking for concrete ways to build experience and test your interest in policy, consider:

- BlueDot Impact's *Frontier AI Governance Course*
- Harvard's *The Governance of Artificial Intelligence* course curriculum by Joan O'Bryan
- The Center for AI Safety's *Ethics and Society* Course
- Read US government strategies, such as the White House's 2025 *AI Action Plan* and NIST's 2023 *AI Risk Management Framework* to test your interest.
- Read think tank reports, such as from CSET, CNAS, CSIS, and IFP, and consider writing a short summary and response to one to get practice.
- Review past mentors' projects for SPAR and Future Impact Group to see what open problems there are in the field.
- Consider Apart Research AI policy hackathons (Berkeley, DC).

Fellowships

If you're looking to break into AI policy, these programmes offer structured support with mentorship, funding, and access to active researchers.

- SPAR and Future Impact Group (global, part-time)
- IAPS Fellowship (US in DC or remote, full-time during summer)
- GovAI Fellowship (US and UK streams, full-time three months)
- LawAI Fellowship (seasonal, lawyers or law students)
- ERA Cambridge and Pivotal policy streams (UK)
- MATS and Astra policy streams (three or more months full-time)
- RAND CAST Fellowship (US or UK, one year or more full-time)
- Horizon Fellowship and TechCongress Fellowship (DC, one year or more full-time)
- Talos Network Fellowship (Europe, full-time)
- A much longer list can be found here.

AI policy organisations

A growing ecosystem of organisations are working on developing and shaping AI policy. The list below highlights some key players, but a larger list is available here or on our job board.

- Americans for Responsible Innovation
- Center for Security and Emerging Technology
- Foundation for American Innovation
- GovAI
- Institute for Progress
- RAND
- Secure AI Project and Encode
- Congressional staffing and executive branch positions, or their parallels in non-US governments, can also be highly impactful.

Staying up to date with AI policy developments (podcasts, newsletters, etc)

Here are our top recommendations for keeping up with the latest developments and debates in the field.

- *Transformer News*
- Helen Toner's *Rising Tide*
- Dean Ball's *Hyperdimensional*
- Zvi Mowshowitz's *Don't Worry About the Vase*
- *The 80,000 Hours Podcast*
- *The Cognitive Revolution* Podcast
- *The AI Policy Podcast* by CSIS

Want one-on-one advice on pursuing AI policy careers?

We think the risks from AI could be the most pressing problems the world currently faces. If you think you might be a good fit for a career path that contributes to solving this problem, we'd be especially excited to advise you on next steps, one-on-one.

We can help you consider your options, make connections with others working on reducing risks from AI, and possibly even help you find jobs or funding opportunities — all for free.
